

## Quick reference

MOSAIQ versions 2.64 & above  
LPCMSQCOMM170111

# 2.64 Medication Treatment Pane

1. Available in Patient Chart or "MO Treat"
2. Available filters include: Date Range, Order Status, Dispensing Status and Order Type as well as the ability to sort in columns and drill down using the funnel option
3. Orders may be grouped by care plan or ad hoc orders
4. Able to see at a glance if there are orders available to be treated, orders needing a co-sign, if meds have been dispensed, if administration instructions are attached to an order, if PRN orders are available or if there is a Reference attached to the Care Plan (will be bolded in blue on top ribbon)
5. You may co-sign more than one drug at a time, if selected in Dept Set Up, use ctrl key to select the drugs, then select "Co-sign", 2nd nurse will enter UN and PW on your PC
6. You may select more than one drug at a time to treat, use ctrl key to select the drugs and click Treat
7. If treating out of sequence, you may be required to enter a reason (Site option)
8. Note: For drugs requiring co-signature, this must be done prior to selecting MO Treat
