# Display and Calculate Cumulative Doses

1. In Medication Formulary, select drug that requires cumulative dose to display
2. Enter "Cumulative Dose Limit"
3. Check box "May Exceed with Co-sign"
4. Check box "Calculate and Display Cumulative Dose"
5. Click "OK"
6. Click "OK" to exit Formulary
7. In CWS, right click, select "Display Cumulative Dose"
8. To enter previous doses not documented in MOSAIQ
9. Double click on drug name in CWS
10. Enter previous dose in mg, facility, date administered
11. Enter password
12. Dose will display in mg, NOT mg/m\*2
13. Right click and uncheck "Display Cumulative
14. Dose" to display Dose Basis
